P(DOOM)1 — FIELD PACK

30 pages · greyscale · built 2026-08 · clipboard + scissors edition

HOW TO USE THIS PACK

Show pages. Ask the question printed on each page. Get a tick or a circle in under ten seconds. Cut sheets live at the back — scissors welcome. Tally page is p.20. Every design element has an ID (W…, C…, S…) so a tick is enough.

LINE LEGEND

——————— cut (solid)

- - - - - - fold (dashed)

☐ **ID** tick = preference

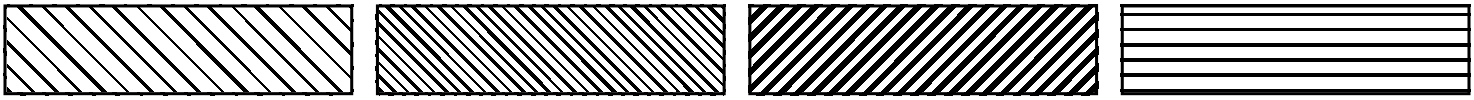

CONTENTS

2 explainer · 3–4 wordmarks W1–W8 · 5 casing N1–N5 · 6 taglines T1–T6 · 7 body type B1–B3 · 8 marks M0–M4 · 9 portraits R1–R5 · 10 event art E1–E4 · 11 cats K1–K4 · 12 card face-off C1–C5 · 13–14 DOOM DIAL prop · 15 pocket dials · 16 tent card · 17 one-cut zine · 18 survey · 19 channels · 20 tally · 21–22 posters P1–P4 · 23–27 business cards · 28–30 slips S1–S3

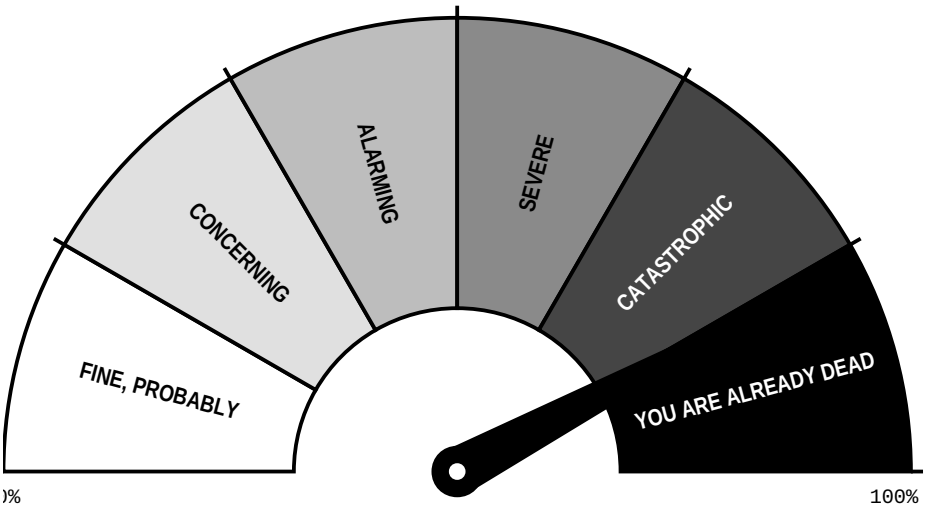

PRINTER CALIBRATION — BROTHER HL-L2460DW, MONO LASER

Tone ramp (nominal % black) and pattern fills. If steps 10–30 merge or 70–90 fill in, note it here and the Monday colour iteration compensates.

hatch 2.2mm | hatch 1.2mm | hatch heavy | crosshatch

Everything stated in this pack is true of build v0.14.1 unless it is printed as a question. The licence is source-available; the game is an alpha; nobody is promised a win screen, because there isn't one.

WHAT IS P(DOOM)1?

the honest one-pager · hand this page to a stranger

Run an underfunded AI safety lab and hold off catastrophe for as long as you can.

You run an underfunded AI safety lab while better-resourced rivals race toward AGI. There is no win screen — alignment is not a thing you finish. You hire researchers, balance their traits, handle burnout, poaching and rival-lab events, and buy time against a rising p(Doom). Every run ends in defeat; your score is the number of turns you survived, and the end screen attributes honestly what killed you.

Actual alpha interface, v0.14 — the game runs dark; this is what it looks like pushed through a mono laser.

- Turn-based strategy, single player. Hire researchers from a candidate pool (Safety, Capabilities, Interpretability, Alignment); teams of up to 8 per manager.
- Researchers have traits — team player, media savvy, leak-prone — and can burn out or be poached by rival labs.
- Random events and rival-lab actions land every run. Doom rises from reckless research.
- **There is no victory condition.** Score = turns survived. The end screen tells you what killed you, honestly.
- Deterministic seeds: a given seed plays identically for everyone, so scores are comparable.
- Report a bug from inside the game (press **N**) — and your cat can be drawn into the game as an Office Cat, with five doom-level variants, plus a credits listing.

STATUS, STATED PLAINLY

Alpha, v0.14.1, built in Godot 4.5.1. Windows build tested; macOS and Linux builds are published but less tested. Builds are not yet code-signed, so your OS will warn you the developer is unidentified — that is expected, and the website walks you past it.

LICENCE, STATED PLAINLY

Source-available. Not open source, and we won't call it that. The source is public to read and contribute to; no licence is granted to redistribute or sell. A formal open-source licence for the engine is planned around 1.0.

pdoom1.com · github.com/PipFoweraker/pdoom1 · team@pdoom1.com

WORDMARK, ROUND ONE

coordination#66 made physical · tick any you'd stop for · X any you hate

p(Doom)1

W1 · URW Gothic
geometric · Bauhaus lineage (Avant Garde)

☐ **W1**

P(DOOM)1

W2 · URW Gothic
geometric caps, letterspaced

☐ **W2**

p(Doom)1

W3 · Nimbus Sans
grotesque · neutral, industrial

P(DOOM)1

N4
poster caps — used nowhere yet

☐ **N4**

p(doom)

N5
the lowercase term of art, as the field writes it

☐ **N5**

True statement: the project has never decided this. Your tick is a real input.

TAGLINE FACE-OFF

every one of these is true of the build — which one makes you look up?

- [ ] T1 **Run an underfunded AI safety lab. Hold off catastrophe for as long as you can.**
- [ ] T2 **Every run ends in defeat. Your score is how long you lasted.**
- [ ] T3 **Alignment is not a thing you finish. Buy time.**
- [ ] T4 **Made with coffee and existential dread.**
- [ ] T5 **The end screen tells you what killed you. Honestly.**
- [ ] T6 **How many turns can you buy?**

Got a better one? It has to be true. There is no win screen, it is an alpha, and it is source-available — write inside the rails:

BODY TYPE — WHICH WOULD YOU READ A RULEBOOK IN?

same paragraph, three settings · tick the one your eyes forgave

B1 · Liberation Mono · terminal mono — what the game UI actually ships

☐ **B1**

You run an underfunded AI safety lab while better-resourced rivals race toward AGI. There is no win screen — alignment is not a thing you finish. You hire researchers, balance their traits, handle burnout, poaching and rival-lab events, and buy time against a rising p(Doom). Every run ends in defeat; your score is the number of turns you survived, and the end screen attributes honestly what killed you.

B2 · Nimbus Sans · grotesque — the quiet professional

☐ **B2**

You run an underfunded AI safety lab while better-resourced rivals race toward AGI. There is no win screen — alignment is not a thing you finish. You hire researchers, balance their traits, handle burnout, poaching and rival-lab events, and buy time against a rising p(Doom). Every run ends in defeat; your score is the number of turns you survived, and the end screen attributes honestly what killed you.

B3 · C059 · book serif — reads like a rulebook

☐ **B3**

You run an underfunded AI safety lab while better-resourced rivals race toward AGI. There is no win screen — alignment is not a thing you finish. You hire researchers, balance their traits, handle burnout, poaching and rival-lab events, and buy time against a rising p(Doom). Every run ends in defeat; your score is the number of turns you survived, and the end screen attributes honestly what killed you.

Line length, size and leading held comparable; only the face changes. This decides manuals, the website body, and slip copy.

MARKS & EMBLEMS

the thing that goes on a sticker, a favicon, a shirt · tick any

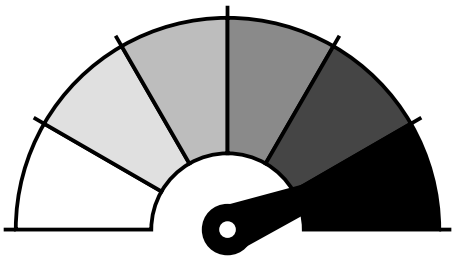

M0 · current game icon (mountain-and-graph emblem). Prints as a heavy toner disc; survives, at a cost.

☐ **M0**

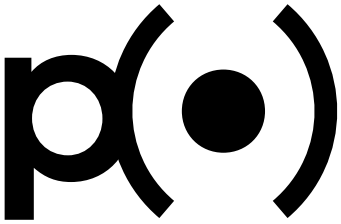

M1 · current wordmark tile (unapproved, see p.4).

☐ **M1**

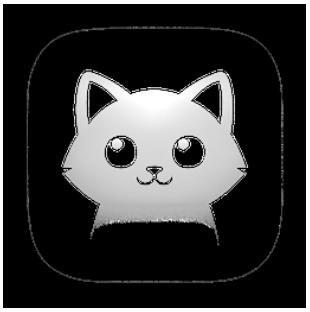

M2 · NEW — the doom dial as a mark. Needle parked in the black. Pure line and tone; laughs at mono lasers.

☐ **M2**

M3 · NEW — p(•): the probability that dare not speak its value. Geometric, Bauhaus-honest, one glyph from being a logo.

☐ **M3**

M4 · the office cat as mascot-mark (from the game's icon set). Dark tile; would be redrawn as linework for print.

☐ **M4**

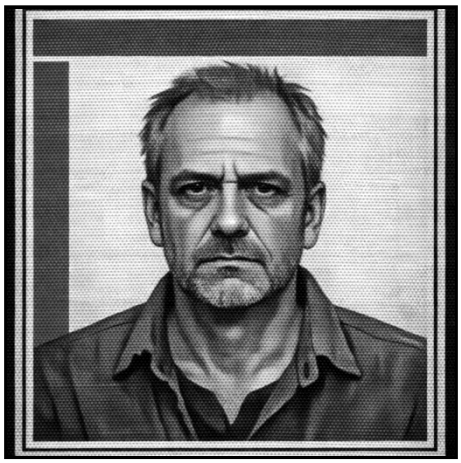

A mark must survive: 12mm on a business card, reversed white-on-black, one colour, and a bad photocopy. M2 and M3 were drawn under those rules. M0, M1 and M4 predate them.

WHICH FACE FRONTS THE POSTER?

real in-game dossier portraits, straight off the mono laser · tick up to two

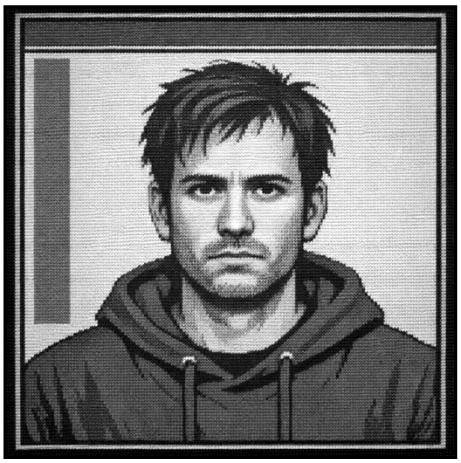

R1 · the authoritarian pessimist ☐ R1

R2 · the burned-out senior ☐ R2

R3 · the capabilities optimist ☐ R3

R4 · the moral crusader ☐ R4

R5 · the people pleaser ☐ R5

These are researcher archetypes you actually hire in the game. They were painted dossier-style and convert to greyscale better than anything else in the repo — which is why this whole pack leans on them.

Bonus question: which one is you?
Write their R-number here:

EVENT ART — WHICH SCENE SELLS THE MOOD?

in-game event illustrations · tick any that pull you in

E1 · the board convenes (reads well in grey) ☐ **E1**

E2 · an opportunity, maybe (reads well in grey) ☐ **E2**

E3 · the graph does a thing (dark — shadows lifted for print) ☐ **E3**

E4 · the filing cabinet knows (very dark — heaviest lift in the pack) ☐ **E4**

Honesty note: E3 and E4 are far darker in the game than shown; their shadows were lifted so a mono laser could hold them at all. The originals would print as toner floods.

CAT REFERENDUM

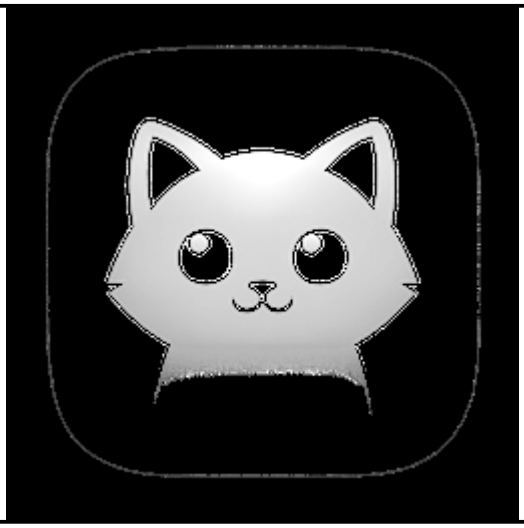

tick exactly one. we know this is the page people will fight over

K1 · the real office cat (photograph) ☐ K1

K2 · icon-set cat, with lamp and coffee ☐ K2

K3 · icon-set cat, portrait tile ☐ K3

K4 · icon-set cat, doom variant ☐ K4

True and standing offer: report a bug (press N in-game) or help playtest, and your own cat can be drawn into the game as an Office Cat — five doom-level variants, credits listing included.

BUSINESS CARD FACE-OFF

five designs at true size · tick the one you'd keep in your wallet

Each design has its own uncut sheet of ten at the back of the pack (pages 23–27) — scissors turn a tick into a pocketful. The sampler sheet p.27 carries two of each for pocket A/B tests.

FIELD PROP NO. 1
clipboard-mounted
audience-adjustable
doom forecaster

P(DOOM) RATING TODAY

OPERATING NOTE
the needle only
ratchets clockwise*
*mechanically untrue, thematically accurate

SOURCE-AVAILABLE ALPHA · PDOOM1.COM

CUT along the outer solid border of this whole panel. The dotted circle at the dial's hinge is the pivot — assembly and pointer are on the next page. Sign modelled, with respect and one addition, on the Australian fire danger rating sign; the addition is the band the fire signs never needed.

DIAL ASSEMBLY

one pointer, one stand, four steps, zero excuses

POINTER — cut on the outline, punch the marked hole

POINTER — cut on the outline, punch the marked hole

Two pointers because the first one always gets bent in the bag.

TAPE HERE

EASEL SPINE

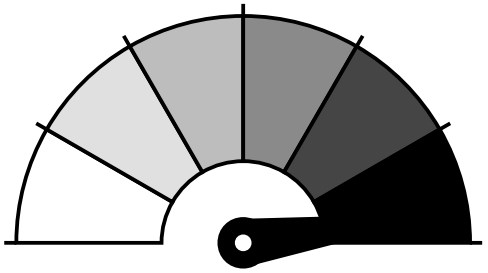

FOOT

STAND — cut out, fold on dashed lines into a Z, tape the first panel to the sign's back. The dial now stands on a table.

ASSEMBLY

1. Cut out the sign (p.13) on its solid border.
2. Cut out one pointer; punch the marked pivot holes in pointer and sign (hole punch, or a pen nib on a soft surface).
3. Fasten with a split pin / brass fastener. No pin? Unbend one loop of a paperclip through both holes and tape the back.
4. Fold the stand, tape it on, stand it next to the clipboard. Invite strangers to set today's rating. Do not reassure them.

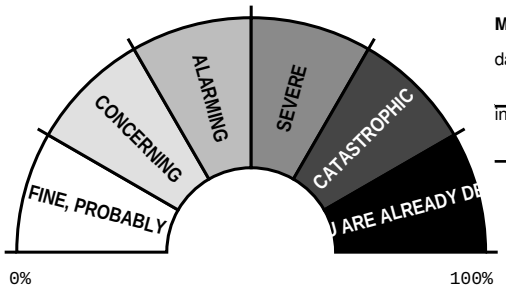

Prints better on card stock. Ordinary paper works if you laminate it or back it with the cereal box you were going to recycle anyway.

factory setting

POCKET DOOM DIALS

cut the four cards · hand a pen to a stranger · they draw their own needle and keep it

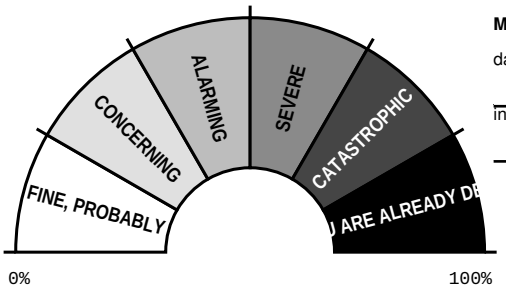

MY P(DOOM)

date: _____

initials: _____

draw your needle on the dial · keep the card · pdoom1.com

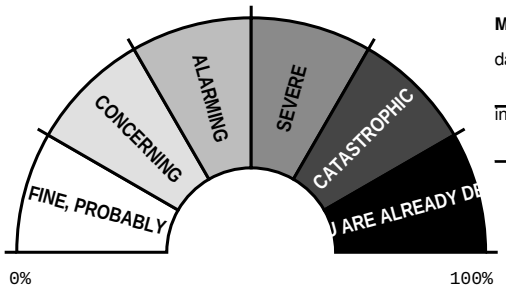

MY P(DOOM)

date: _____

initials: _____

draw your needle on the dial · keep the card · pdoom1.com

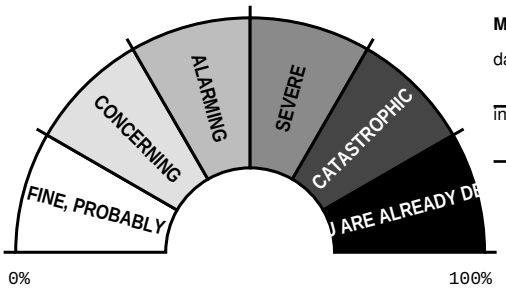

MY P(DOOM)

date: _____

initials: _____

draw your needle on the dial · keep the card · pdoom1.com

MY P(DOOM)

date: _____

initials: _____

draw your needle on the dial · keep the card · pdoom1.com

Why this works: nobody will tell you their p(doom), but everybody will draw it. The card is a souvenir, the URL is on the souvenir, and the conversation has already happened. Restock from p.15 of this pack.

pdoom1.com · source-available alpha

Run an underfunded AI safety lab and hold off catastrophe for as long as you can.

p(Doom)1

ASK ME ABOUT
THE GAME YOU CANNOT WIN

p(Doom)1 · pdoom1.com

BASE FLAP — fold both dashed lines the same way, tape this flap under the first panel: triangle tent, two faces, stands on any table. Faces read correctly from both sides.

p(Doom)1

an eight-page briefing
on a game you cannot win

fold-it-yourself edition

ONE-CUT ZINE: fold in half long-ways, cut the heavy line, fold into an 8-page A7 booklet (fold lengthwise, push ends inward so the slit opens, wrap flat). Top row is upside down on purpose.

pdoom1.com

github.com/PipFoweraker/pdoom1

team@pdoom1.com

1 · THE PREMISE

You run an underfunded AI safety lab. Better-resourced rivals are racing toward AGI. Your job is not to win — alignment is not a thing you finish. Your job is to buy time.

2 · THE WORK

Hire researchers — Safety, Capabilities, Interpretability, Alignment. Balance their traits. Handle burnout and poaching. Respond to rival labs and to events you did not choose.

3 · THE CATCH

There is no win screen. **Every run ends in defeat.** Your score is the number of turns you survived, and the end screen tells you honestly what killed you.

✂ CUT ONLY THIS HEAVY LINE

4 · THE FAIRNESS

Deterministic seeds: a given seed plays out identically for everyone. Scores are comparable. Your defeat and my defeat can be measured against each other, which is its own comfort.

5 · THE CAT

Report a bug (press N in-game) or help playtest, and your actual cat can be drawn into the game as an Office Cat with five doom-level variants. This is a real program with credits listings.

6 · THE STATUS

Alpha, v0.14.1, built in Godot 4.5.1. Windows / macOS / Linux, free download. Source-available — not open source; the source is public to read, and an open-source engine licence is planned around 1.0. Builds are not yet code-signed; your OS will grumble once.

SIXTY-SECOND SURVEY

clipboard page · tick fast, no wrong answers, one page then flip

1. Had you heard the term “p(doom)” before today?

☐ yes ☐ no ☐ heard it, couldn't define it

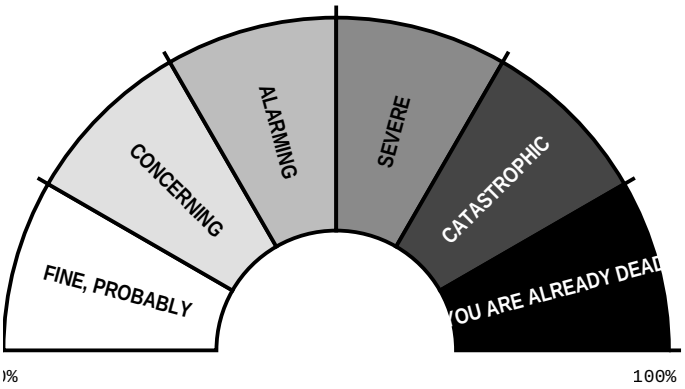

2. A strategy game where every run ends in defeat and the score is how long you lasted. Gut reaction?

☐ bleak, love it ☐ bleak, hate it ☐ roguelike players eat this daily ☐ need to see it

3. Where would you play it?

☐ Windows ☐ macOS ☐ Linux ☐ browser ☐ phone ☐ Steam Deck

4. Mark today's personal p(doom) on the dial:

5. Would you playtest an alpha?

☐ yes ☐ no ☐ only if the cat program is real (it is)

6. Optional — where should the playtest invite go? **(used for that one invite, nothing else)**

---

collected on paper by Pip Foweraker · pdoom1.com

WHERE WOULD YOU LOOK FOR IT?

distribution is a decision we haven't made — your tick is data

1. You hear about an indie AI-lab strategy game. Where do you go first?

- [ ] Steam
- [ ] itch.io
- [ ] the game's own website
- [ ] GitHub releases
- [ ] a browser version, no download
- [ ] phone app store
- [ ] I wait for a friend to make me

2. What would you type into a search box to find it?

---

3. Fair price for the finished 1.0, one honest tick:

- [ ] free forever
- [ ] pay-what-you-want
- [ ] $5
- [ ] $10
- [ ] $20
- [ ] depends on hours of play

4. The alpha today is a free download from GitHub via pdoom1.com. Does knowing that change your answer to Q3?

- [ ] no
- [ ] yes, higher
- [ ] yes, lower
- [ ] stop asking hard questions

Everything above is a question about the future, not a promise. Current truth: free source-available alpha, downloadable now, Windows build tested, macOS/Linux published with less testing.

BETWEEN ROUNDS? RUN AN AI LAB. LOSE SLOWER.

Turn-based lab management, single player, runs on a laptop that has seen things. Draft researchers, manage burnout, answer to the board. Every run ends in defeat — the score is turns survived, like a gauntlet you can brag about. Deterministic seeds mean your loss and your mate's loss are comparable.

pdoom1.com · free alpha · report a bug in-game (press N) and your cat can be drawn into the game S2

A GAME ABOUT THE ALIGNMENT PROBLEM THAT REFUSES TO PRETEND YOU CAN WIN

p(Doom)1 is a strategy game: run an underfunded safety lab while rivals race to AGI. Alignment is not a thing you finish, so the game doesn't let you finish it — you buy time, and the end screen attributes your defeat honestly. Alpha, source-available, free. Playtesters and bug reports genuinely shape it — the in-game reporter is one keypress (N).
